"For the past sixteen years I have had torpid liver and indigestion and tried many doctors and patent medicines but I could not get a cure," writes Mrs. Simeon Suggs, of Clyde, Sabine Parish, La. "Three months ago I thought I would try Dr. R. V. The symptoms were coated tongue, specks before the eyes, disposed to be cross and irritable, foul stomach, bad taste in the mouth, tired feeling, a feeling of dread or fear, headache, yellow skin, etc. These symptoms did not all noppart at once. A number of business men and railroad officials of St. Louis tendered Harry C. McGuire a banquet at the Planters Hotel last night. Mr. McGuire has been connected for several years with the Big Four, and has already announced in these columns that he will shortly assume a position on the Chicago and Alton. His official title will be Eastern passenger agent, with head-quarters at New York.

Thirry covers were laid and each guest was presented with an elaborate menu card, appropriate to the occasion, J. M. Hunt of the Alton was toastmaster, and nearly all of Mr. McGuire's friends made brief speeches.

He was presented with a solid gold chain and charm. The locket bore an emerald and diamond of rare value.

A special feature of table decoration was a minature train of cars, done in colored sugar. The lettering on the cars read: "The Prodigal's Return to the Only Way."

TIE-PRESERVING PLANT. Great Northern Has Let Contracts for

St. Paul, Minn., Feb. 2.—The Great Northern to-day let contracts for machinery to be used in a remarkable railroad tie preserving plant to be erected on Clearwater Lake, ten miles south of Kalispel, Mont. The cost of the plant, in running order, will be about \$190,090. The rails conecting the site of the plant and Kalispel have been completed and a circular to that effect will be issued to-morrow.

a circular to that effect will be issued to-morrow.

Flathcad Lake is surrounded by an inex-haustible supply of cedar and hemlock, large areas of which have been bought by the Great Northern. A saw mill will be erected on the banks of the lake and the lumber will be rafted to the mill. The ca-cacity of the process plant will be 2,500 ties per day.

They are not statements made by an advertiser, or testimonials which have been bought. Your own common sense will tell you that stomach medicines, sprays and vapors cannot reach the disease, and your doctor and the Government reports will prove the rest. As to the only cure for these diseases, it is called HYOMEI.

HYOMEI is the only cure because no other germicide of sufficient power to kill the germs of Catarrh, Bronchitis and Consumption can be inhaled in the air we breaths.
